OF WASHINGTON, D. C.

THE weapons and arms described in the following catalogue are mainly the collection of Mr. C. H. Kindle, of Washington, D. C., and have been accurately described by Mr. Stephen van Rensselaer, whose expert knowledge of antique fire-arms and edged weapons is fully recognized.

The sale will be conducted by MR. WALTER S. SCOTT who for several years successfully conducted auction sales of this character for the firm of Scott and O'Shaughnessy and who is well-known to collectors throughout the country.

The sale will be held by Mr. Scott at The Walpole Galleries, 10 East 49th street, New York, on the morning and afternoon of April 14, 1920, where the MATERIAL WILL BE ON EXHIBITION FROM APRIL 12.

Mr. Scott will be in attendance during the exhibition and will be very pleased to meet his old friends at the sale. The material having been catalogued by Mr. Stephen van Rensselaer, who was usually engaged by Messrs. Scott & O'Shaughnessy for similar work, an examination of the catalogue will convey, even to the casual eye, the accurate knowledge and careful work of the expert. So many interesting and important pieces are described that no attempt is made here to single them out, although nearly one hundred pieces are illustrated as representative of the fine character of the collection.

Our salesroom is conveniently located at 10 East 49th street, just east of Fifth avenue, where the entire collection will be on exhibition from April 12, three days prior to the sale.

4. MOORISH MATCH LOCK GUN, length 6 feet, belled muzzle, stock runs to three inches of the muzzle and is held to the barrel by rattan bindings. On each side of the stock are bone insets. one of which is missing. GENUINE OLD PIECE IN ORIGINAL CONDITION.

5. ARABIAN HORESMAN'S PERCUSSION GUN. Length 53 inches. Half octagon barrel, about calibre .55. Half stock, which is entirely covered with brass, nicely engraved. The butt is of the usual type, and has two rings for slinging. The breech is marked with maker's name. Unusual piece, in very fair condition.

6. ALGERIAN HORSEMAN'S MIGUELET LOCK GUN, length 51 inches, slender barrel, belled at the muzzle. Iron barrel support with engraved brass bands. The frame is also of metal engraved in foliated design. Very narrow butt with some wood on each side. Genuine old piece in good original condition. See illustration Plate 2.

9. FINE FLINT-LOCK KENTUCKY RIFLE. Length 54 inches. Octagon barrel about calibre .40. Curly maple stock, brass mounted. Silver name plate on comb, and 8-pointed silver star, and raised cheek piece. The lock is marked "Faust & Winebrene". This is a plain rifle, hand made through out, AND IS IN ABSOLUTELY ORIGINAL CONDITION. It is a good example of the early Pennsylvania gunsmith's art and it is seldom indeed that one is found in original condition.

10. RARE EARLY AMERICAN SUPERPOSED FLINT LOCK GUN. Length 53 inches, octagon barrels, the rifled one being about calibre .36, the other smooth bore calibre .38. Brass ribs on each side of barrels and two ramrods. Double set triggers, very pretty curly maple stock with fancy engraved German silver patch box and four German silver ornaments and raised cheek piece. This is AN EXTREMELY FINE SPECIMEN OF THIS VERY SCARCE TYPE OF COMBINATION ARM. Seldom found any better. See illustration Plate 2

11. RARE U. S. FLINT LOCK MUSKET, marked "N. Haven" within a scroll. Made by Eli Whitney, Sr., either under the 1789 or 1808 contract.

When a contract in 1789 was awarded by the government to Whitney, the Charleville Musket, model 1763, was used as a model. Whitney, however, was familiar with the model 1777 Charleville, and considered its lock a better piece of mechanism. The government officials permitted him to use on his muskets a lock with a flat face and oval faced hammer and an inclined brass pan. (This improvement did not come into general use until about 20 years later). When Whitney received another contract in 1808, he made muskets on the same design and marked them similarly; thus it is difficult, when a musket bears no other marks, to tell when he made it.

The bayonet is missing, otherwise in very good original condition.

12. RARE VALLEY FORGE U. S. FLINT-LOCK MUSKET marked "Evans C. P. (Continental Property)." This frame was made at Valley Forge, and is one of the earliest types, having the lock like the Charleville musket. AN EXCEEDINGLY SCARCE HISTORICAL PIECE. Some repairs to the

wood work around the lock, but it is neatly done and hardly shows. It is otherwise in good condition. Ramrod and bayonet missing.

13. FINE FLINT-LOCK KENTUCKY RIFLE, length 57 inches. Very fine full curly maple stock, brass mountings of artistic design and nicely engraved checked grip, unusually pretty patch box, engraved in various designs, and raised cheek piece. The lock is marked J. Henry—one of the most celebrated of the old-time Pennsylvania rifle makers—This is without doubt the finest rifle of this sort that has been sold by us.

See illustration, Plate 2

14. FLINT LOCK TELESCOPE SIGHT RIFLE. This is the first rifle of its kind that the cataloguer has seen. Plain match rifle in very good condition.

15. RARE U. S. FLINT LOCK MUSKET. similar to the Brown Bess musket but marked on lock in script U. S., and also fitted with elevating rear sight. An exceedingly rare musket in good condition, requiring cleaning only.

25. VALLEY FORGE U. S. FLINT LOCK MUSKET. Marked "W. L. Evans, V. Forge, U. S. 1826." Rare historical musket, in very good complete condition, with ramrod and bayonet. Very desirable piece.
